DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which

are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to

elect a single invention to which the claims must be restricted.

Group I, claims 14 and 15, drawn to a pharmaceutical composition obtained from the green or mature fruits of *Roystonea regia* comprising: a mixture of primary fatty acids with 8 to 28 carbon atoms, the fatty acid selected from the group consisting of caprilic acid (C8:0), capric acid (C10:0), lauric acid (C12:0), miristic acid (C14:0), palmitoleic acid (C16:1), estearic acid (C18:0), oleic acid (C18:1), linoleic acid, and a mixture of esters of the fatty acids; wherein free fatty acids are enriched from esters hydrolisis.

Group II, claims 16-20, drawn to a method for the obtention of the pharmaceutical composition obtained from *Roystonea regia* according to claim 14 comprising: drying, grounding, and sieving the *Roystonea regia* fruits, and separating of the extract from other components through a solid/liquid extraction in organic solvents, where in the organic solvents are chosen from hydrocarbons of 5 to 8 carbon atoms, alcohols of 1 to 3 carbon atoms, and mixture thereof, with or without a previous basic hydrolysis using hydroxides or alkalis.

Group III, claims 21-25, drawn to a method for treating and/or to prevent BPH, prostatitis, alopecia and hirsutism comprising administering a medication comprising the pharmaceutical composition according to claim 14.

Please note that claim 17 is dependent upon claim 10, which has been cancelled. It appears that claim 17 should be dependent upon claim 16, so claim 17 has been included in this group. Please cancel the claim, or amend the claim to place the claim in proper dependent form, or rewrite the claim in independent form.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 14, at least, is anticipated by or obvious over Stillman et al. (U, "Composition and Characteristics of Cuban Palmiche Nut Oil" Oil and Soap. Vol. 11, no. 10 (October

1934) 208). Stillman teaches oil obtained from the fruit of the royal palm (Roystonea regia). Stillman further teaches that the oil was saponified and fatty acids were liberated with hydrochloric acid. Consequently, the special technical feature which links the claims does not provide a contribution over the prior art, so unity of the invention is lacking.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP

§ 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy L. Clark whose telephone number is (571) 272-1310. The examiner can normally be reached on Monday to Friday between 8:30am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terry McKelvey can be reached on (571) 272-0775. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
